I have many years of controlling and accounting experience being responsible for the Nordics region in international companies. Previously I have had roles as Finance project manager, leading and implementing projects within Finance and representing Finance in larger cross functional projects, Business controller, Cost controller, FP&A Manager and various roles within accounting. As a consultant I bring structure and provide key insights to enable the business to make well informed decisions. I have experience working for companies in the IT industry, FMCG and Pharma.

As a person I am very positive and result driven. I believe that sharing information is key to a successful business.

#### Example projects

- Interim Business controlling
- Implementation of Indirect Procurement systems
- Financial Process improvement and creation of related documentation
- Educating non-Finance employees in basic Finance
- New business PL management

#### Education

- Finance, Uppsala University
- Accounting, Företagsekonomiska Institutet Stockholm
