I am a consultant in the areas of budget, controlling, accounting and reporting. My experience in finance is extensive and it comes from various positions as Controller, Senior Accountant and Financial Manager in multinational medium and large companies. In these types of organizations, change is part of the daily work rather than an exception.

I always try to follow the phrase “Live in the present, look ahead, reflect backwards” For me it is about being curious, taking on challenges and always striving to find opportunities where others see difficulties.

As a person I am positive, loyal and open. I have high working capacity and I am used to work under time pressure. I have easy to get in contact with people and gain their trust. I like to work with teams, to accomplish goals together but also to get the chance to bring in a bit of humor into work as it makes the challenges more fun as well.

Example assignments

- Closing of books and reporting, including bridge between management and legal reporting
- Developing internal reporting packs as a basis for external reporting
- Budgeting and variance analyses
- Accounting for Nordic shared services based in Sweden
- Production accounting projects and reporting within pharmaceutical industry
- Implementation of internal controls according to Sarbanes Oxley (SOX) and other internal controls
- Creating excel templates for use in daily work, reconciliations and reporting.

Education

- Master of Science in Business and Economics, Uppsala university
- All good and bad experiences from the “school of life”
